Summer 2011

Façade:

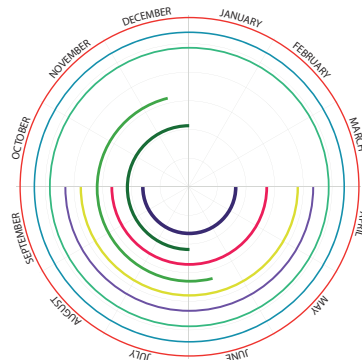

NATALIE JEREMIENKO xCLINIC FARMACY

The artist/engineer/activist/experimenter extraordinaire, Natalie Jeremijenko, will turn Postmasters' façade green. She will conduct a clinical trial of [xClinic's Farmacy](#), a distributed urban farm aimed at encouraging urban food production, diversifying food systems and improving environmental health. The vertical garden will be constructed with Jeremijenko-designed durable, efficient [AgBags](#), in which edibles will be grown and then sold at the green market throughout the summer.

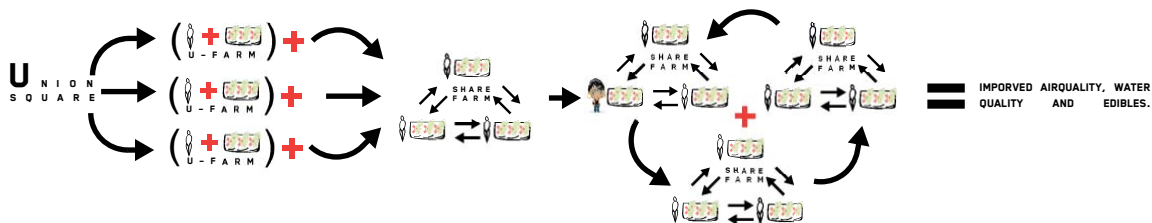

FARMACY

FARMACY is a distributed urban farming system that is designed to improve environmental health and augment biodiversity in addition to producing edibles. This system is optimized for (yummy) urban foods (ufoods), i.e. new foods appropriate for the challenging urban context. Farmacy addresses the issue of little or no access to soil, little or no space, compromised air and water quality among other challenges-and for improving air and water quality, and quality of life for humans and non-human organisms alike, that is, towards robust resilient and healthy BiodiverCITY

-  Blackberries
-  Hops
-  Raspberries
-  Kale
-  Daylilies
-  Violets
-  Insects
-  Birds

THE XCLINIC'S FARMACY IS A DISTRIBUTED URBAN FARM DESIGNED TO IMPROVE ENVIRONMENTAL HEALTH, AUGMENT BIODIVERSITY, AND PRODUCE FOOD. SPRING '11 IS THE LAUNCH OF CLINICAL TRIALS.

HOW IT WORKS
